SMART Goal

Soil Improvement Goal:

Increase the soil health index to 75 or higher by the end of the sixth month.

Water and Electricity Installation Goal:

Achieve 80% of energy needs met by solar panels and establish reliable water sources by the end of month 8.

Crop Planting Goal:

Successfully plant at least 5 different crop types by the end of the first planting season.

Budget Monitoring Goal:

Keep project expenses within 10% of the original budget by monitoring the percentage used at the halfway point.
